Amaze With Lumbar Support

Amaze Without Lumbar Support

DynaFlex

The DynaFlex System

This unique system is designed to offer unprecedented flexibility and freedom to the user, putting items on either side within easy reach. It also features a special flex lumbar support that synchronises perfectly with your back in all positions of recline. While in the upright, locked position, DynaFlex provides a comfortable cushioning that stimulates the spine and abdominal muscles to promote a healthy posture and back.

DynaFlex delivers comfort for long hours at the upright 90° position typically suited for computer use. It does so by unconsciously exercising the user's upper body consistently through the day, thereby discreetly and effectively promoting healthy seating and improved work efficiency.

LADY LINEA

Exclusive

Lady Linea Cushion and Mesh

The lady chair

Tailored to the specific ergonomic requirements for female posture, making it feminine in terms of function and support, but classic in every other sense.

- The chair is smaller as women are generally smaller than men.
- The sensitivity of the tilt must allow for users weighing > 43kg
- The relation between seat and back should be relatively predetermined and synchronous
- The seats front edge should be rounded or tiltable in a forward direction
- The height of the backrest should not exceed the users shoulder blades, according to studies preferably about 6cm below the shoulder blades
- The backrest should project further forward if the user adopts a forward/active sitting posture

The centre of gravity should be different in different seating positions

The centre of gravity in different seating positions
