Collaborate

Inspiring individuals, integrating teams

Individuals work differently to teams. Different methods have different requirements; privacy versus openness, contemplation versus discussion. Different methods require different spaces- places of participation, places of sanctuary. But what if we changed this way of working? Created a space that was ours but also open? A space that could galvanise individuals to work the way they needed, whenever they needed? A space of balance and innovation. Featherlite presents Collaborate.

Space

Empowering individuals to take charge of their environment.

Teamwork

Work together, build together. The next step is only a desk away.

Innovation

Everything is a work in progress. Collaborate makes progress easy.

Collaborate blends elegant design with functionality. The multi-faceted tubes give it a sharp, clean and angular look. It is designed to look beautiful and work perfectly, so even the simplest tasks are more engaging.

Collaborate takes engineering right to the edge. German precision tools are used to specially roll-form the tubes, and high pressure, die cast aluminium is used to form the joints. The result a beautiful, minimalist product with unparalleled levels of strength and stability.

Aesthetics

Collaborate systems are designed to reduce visual clutter. The design features absolutely no visible hardware and the light, elegant lines of the structural components provide the perfect frame for shaping an open and inviting workplace.

Simplicity

With separate raceways for electrical and data cables. Technology management couldn't be simpler and more efficient. Flip up ports reduce hassle and bring accessibility right to your fingertips.

Practicality

Collaborate systems are modular and easily flat packable. The product can be shipped anywhere across the globe and assembled with ease.

Collaborate L

For collaboration to cultivate creativity and progress, teams require versatile spaces that are more appealing and conducive to developing their work.

Designed for users that need a balance between privacy and collaboration, the L-shaped arrangement of Collaborate provides users with individual spaces that are ideal for working in groups. Teams have instant access to the richest resource available in the office—each other.

Workstations are customisable to fit in with the requirements, atmosphere and ethos of each user's workspace.

Collaborate Linear

Collaborate Linear presents new ideas to optimise the use of space in office environments and offers the ideal template for developing an open and welcoming workplace that is versatile and well-organised.

Providing a uniform, professional aesthetic for offices with a large number of users, Collaborate Linear maintains an environment where productivity is key. Individuals will find themselves in a pleasingly customisable space where work can be enjoyed and concentration is made easy.

The Collaborate Linear arrangement presents a sustainable, economic solution and maximises space potential.

Collaborate Cabin and Conference

Tasteful desk and storage solutions for individual cabins and conference spaces. Collaborate Cabin and Conference furniture simplifies planning while maintaining a consistent aesthetic throughout the office.

Managers need versatile spaces to facilitate their complex roles. Collaborate's Cabin range consists of tables and storage units that are completely customisable to fit your space, aesthetic, and privacy requirements.

Collaborate Conference tables make for an engaged and productive meeting space. Simplified wire management and a wide range of sizes allows for a variety of applications.

Aluminium

ABS

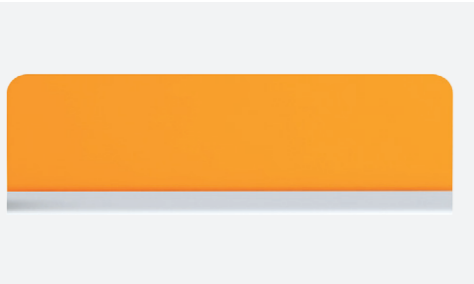

Flip-up data and electrical ports are available in Aluminium and ABS in a range of sizes depending on the number of switches required. The design is brushless and gasket free with openings for wires on three sides to ensure the least clutter and neatest aesthetic. The Aluminium option comes with a soft close mechanism.

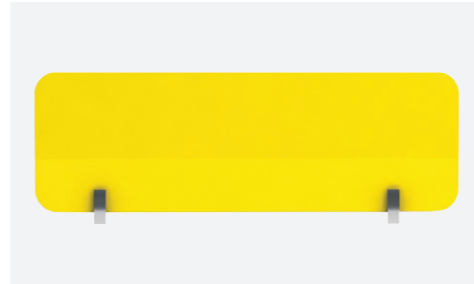

- Aluminium:
- 300mm - 6 module + data port
- 350mm - 8 module + data port
- 450mm - 8+3 module + data port
- 600mm - 8+6 module + data port
- ABS:
- 300mm - 6 module + data port
